

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, October 29, 2019 – 0800 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (55 new fires)
New large incidents:	4
Large fires contained:	0
Uncontained large fires:***	10
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	0

Nationally, there are 6 large fires being managed under a strategy other than full suppression.

\*\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Northern California Area (PL 3)**

New fires: 26  
 New large incidents: 0  
 Uncontained large fires: 3  
 Type 1 IMTs committed: 1

**Kincade**, Sonoma-Lake Napa Unit, Cal Fire. IMT 1 (Cal Fire Team 6). Ten miles northeast of Geyserville, CA. Timber, chaparral and short grass. Active fire behavior with isolated torching and spotting. Several communities and energy infrastructure threatened. Evacuations, area and road closures in effect.

**Burris**, Mendocino Unit, Cal Fire. Four miles south of Potter Valley, CA. Chaparral and tall grass. Moderate fire behavior with creeping and isolated torching. Structures threatened.

**Caples**, Eldorado NF, USFS. Eighteen miles southwest of South Lake Tahoe, CA. Timber and brush. Minimal fire behavior with creeping, backing and smoldering. Area and trail closures in effect.

Incident Name	Unit	Size		%	Ctn/Comp	Est	Personnel		Resources			Strc Lost	\$\$ CTD	Origin Own

\*\*\*Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

**Predictive Services Discussion:** The next round of Foehn Winds will begin to ramp up tonight across Northern and Central California today and tonight. Expect another extended period of critical conditions in the prone areas. Dry conditions will continue across most of the West as a high pressure ridge over the eastern Pacific Ocean begins to approach the coast late in the day. Temperatures in the far western areas will remain well above average for late October. A breezy northerly flow will continue across the Interior West along and just west of the Continental Divide. Light to moderate snow will be possible across eastern Colorado and western Kansas along a weakening, southward moving frontal boundary. Overall dry conditions are expected across the East as well under a dry southwesterly flow pattern. However, the remnants of a stalled frontal boundary will allow for scattered showers and storms to develop across Florida, South Georgia, and the eastern portions of the Carolinas.

## NFDRS PocketCards

*Weather - Fire Behavior Category*

The NFDRS PocketCard is a tool for field personnel to locally track outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season. It is based on current and historical weather for a localized area and the area's historic fire occurrence. The PocketCard displays a general assessment of the fire potential and identifies combinations of local weather and fuel conditions that might contribute to severe fire behavior.

### The PocketCard provides:

- A general indicator of the potential fire danger for a given rating or protection area.
- A graph showing the trend and status of the current year's fire season.
- A comparison of current year conditions to historical worst and average conditions.
- Fire danger values related to past large or problem fires.
- Critical local thresholds for temperature, humidity, wind speed, and fuel moistures associated with large or problem fires.

### Discuss the following ways to use the PocketCard:

- Use it primarily before fires occur, before arriving at a fire. It is also useful during initial fire size-up, initial attack, and extended attack.
- Use it to learn of critical thresholds that predict the potential for extreme fire behavior for the local area. Be aware that local critical thresholds may be occurring earlier in the season.
- Use it to compare current and predicted local fire danger to historical local fire danger to enhance situational awareness.
- Use it to track daily fire danger indices that gauge the potential for weather and fuels to support extreme fire behavior, and of the difficulty of control.
- Use it to supplement local experience.
- Use it as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive a fire assignment outside your local area, visit the National PocketCard website at <https://famit.nwccg.gov/applications/WIMS/PocketCards> where PocketCards are filed by Geographic Area.
- Put it in the pocket of all your firefighters and keep one in your fire vehicle.
- Post it in dispatch. Use them in briefings. Provide them to incoming crews.
- **Do not use the PocketCard for site specific fire behavior predictions and fireline actions or without an interpretive briefing.**
- Review definitions and implications of ERC and BI values.
